

## ER Diagram of the Final Project

### ER Diagram

Use the Entity-Relationship Model for the conceptual design of your database. Your diagram should depict entities, relationships, multiplicity, etc.

You do **not** have to do an Enhanced ER diagram – ONLY what we learned with a regular ER Diagram.

*Note: You should have at least 4 entities.*

Submission: Submit the following to the folder titled ER Diagram on the D2L Assignments tab:

1. ER Diagram
2. A few paragraphs explaining the ER Diagram.
